

Quillmere RF500 French Door Refrigerator User Manual

1. Specifications

- Total capacity: 28 cubic feet.
- Ice production: up to 4 lb per day.
- Water filter: RF-W50. Replace the water filter every 6 months.
- Estimated energy use: 650 kWh per year.

2. Temperature and Controls

Recommended settings: set the refrigerator to 37 degrees F (3 degrees C) and the freezer to 0 degrees F (minus 18 degrees C).

Door alarm: an alarm sounds if a door stays open for more than 2 minutes.

Control lock: press and hold the Lock button for 3 seconds to lock the control panel.

3. Ice Maker and Water Dispenser

After installation, allow 24 hours for the first ice. Discard the first 3 batches of ice.

If no ice is produced, check that the ice maker switch under the ice bin is set to ON and that the household water supply valve is fully open.

After replacing the RF-W50 filter, dispense 3 gallons of water to flush air from the line.

4. Error Codes

- E04: Evaporator fan fault. Keep the doors closed and schedule service.
- E11: Freezer temperature sensor fault. Schedule service.
- E17: Ice maker fill tube frozen. Turn the ice maker off for 2 hours to let it thaw.
- E21: Water filter bypass detected. Install an RF-W50 filter.
